Passionate Web Developer with 4+ years of professional experience in front-end development.

My goal is to be a part of a dynamic work environment where I can utilize my knowledge and skills to assist with the growth of the organization and myself.

EXPERIENCE

Lead Developer | Net Driven

August 2019 - Present

- Build templates to reduce the development time for sites.
- Spearheaded project to implement the use of the CSS preprocessor SCSS on platform by using a Gulp.js workflow.
- Integrate third party applications on sites.
- Collaborate with the back end team to ensure product deployments are rolled out efficiently and accurately.
- Manage and train remote developers.
- Review and delegate daily tasks in the work queue.
- Create process documentation.
- Debug and deploy fixes for errors on the platform.
- Create custom reports using Salesforce to refine workflow.

Front-End Developer | Net Driven

July 2016 - August 2019

- Develop websites on the DotNetNuke platform for the automotive industry.
- Ensure websites are built with optimal SEO practices.
- Work with HTML, CSS, and jQuery to convert wireframes into fully functioning websites.
- Manage all national tire rebates to ensure assets are created and rebates are set to start and expire on the correct date.
- Design graphics for websites using Adobe Creative Suite.
